Additional Recommended Add-On EMN ORTHO NUTRITION BUNDLE: \$295

A 4-Week Nutrition program. Recommended to help you recover faster and stronger

ISolution®: An ion-exchange protein isolate with elevated leucine content. Taken before and after surgery to reduce the loss of muscle and improve wound healing.

PREcovery®: A preoperative carbohydrate with rapid-emptying polysaccharides. Taken prior to surgery as an alternative to fasting to reduce surgical stress and improve patient experience.

Purchase at the DME Store or online at <https://emnortho.com/> using code: "GERLINGER"

CRYOKNEE™ INSTRUCTIONS FOR USE

Please scan the QR code for step by step instructions on how to use the THE CRYOKNEE™ BRACE.

- Position the knee wrap or sleeve over the affected knee joint.
- Adjust the straps or fasteners to secure the device comfortably but securely in place.
- Make sure the ice packs or gel packs are positioned over the area of the knee requiring treatment.
- Apply the device for the recommended duration as instructed by your healthcare provider.
- You can use the device multiple times per day as recommended, but allow sufficient time between sessions for the skin to return to its normal temperature.
- After each session, remove the device and allow the skin to warm up naturally.
- Check the skin for any signs of irritation or discomfort. If you notice any adverse reactions, discontinue use and consult your healthcare provider.
